

# THE MONTCLAIR BIRD CLUB

## YOUR WEEKLY BIRD 18

January 7, 2024

The pictures in this issue are by Ardith Bondi

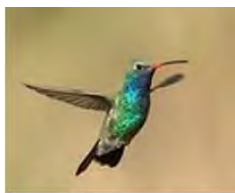

The male and female indigo buntings have the same loud chip, giving them away, but as adults, they look very different. These photos were taken in Garrison, NY, two weeks apart and on two different parts of the property. I think there are several pairs nesting there.

The male is from June 7, the female from June 20, 2023.

If you would like to see your photographs highlighted here, send one or two pictures with a short paragraph to Sandy Sorkin & Rick Wright at [MontclairBirdClub100@gmail.com](mailto:MontclairBirdClub100@gmail.com).
