

THE MONTCLAIR BIRD CLUB

QUIZ 178

March 5, 2023

TRUE or FALSE? Migrating ruby-throated hummingbirds save energy by hitching a ride on the backs of southbound Canada geese.

Link to ponder: Curious about an animal—[any animal!](#)

THE ANSWER IS ON THE NEXT PAGE

A great plan, but it is FALSE. Not only do hummingbirds not hitch rides on larger birds, but Canada geese would be a poor choice anyway. Geese don't usually migrate all that far.

Nothing on their backs, and sometimes they just walk.
