

# THE MONTCLAIR BIRD CLUB

## QUIZ 180

March 19, 2023

One North American bird has 360-degree vision. Yes, it can look over its shoulder without moving its head. What is it?

It isn't a spectacled owl.

Link to ponder: Anna Blackburne (1726-1793)—a neglected patroness of [natural history](#).

**THE ANSWER IS ON THE NEXT PAGE**

## American Woodcock

This woodcock is facing away—but it can still see you.
