

THE MONTCLAIR BIRD CLUB

YOUR WEEKLY BIRD 11

November 19, 2023

The pictures in this issue are by Ardith Bondi

The adult male and female Purple Finches are so different, you might not even think them the same species. Interestingly, these two photos were taken in the same dogwood tree two years apart in Garrison, NY. I love how the adult male matches the fall leaves. He was photographed on October 15, 2020.
