

THE MONTCLAIR BIRD CLUB

QUIZ 117

October 10, 2021

No birds today, just New World monkeys. None are from New Jersey.
Any idea where these may be found?

Link to ponder: Bird bones in three [dimensions](#).

THE ANSWER IS ON THE NEXT PAGE

Howler monkeys are New World monkeys found in tropical Central and South America.

Panamanian white-faced capuchin is a New World monkey found in Central America.

Panamanian night monkey found in Panama and northern Columbia.

Geoffroy's Tamarin found in southern Central America and northern South America.
