

# THE MONTCLAIR BIRD CLUB

## QUIZ 113

September 12, 2021

They are in the family Rallida (rails). What are their names and where are they found?

Link to ponder: [Birds Hall of Fame](#).

**THE ANSWER IS ON THE NEXT PAGE**

**Gray-headed Swamphen**  
*Porphyrio poliocephalus*

**American Coot**  
*Fulica americana*

**Common Gallinule**  
*Gallinula galeata*

**Eurasian Moorhen**  
*Gallinula chloropus*

**Eurasian Coot**  
*Fulica atra*

Gray-headed Swamphen in Florida.  
Introduced from Asia.

Common Gallinule was renamed from  
Moorhen and differs from the Eurasian  
Moorhen in the size and shape of the  
frontal shield.

The American Coot shield is smaller than  
the Eurasian Coot shield.
